

Trail Lake Ranch

**July 21-25
2003**

Summer Science Camp
Grades 4-6

At Home in The Torrey Valley

Creative, hands-on camp with a fun approach to seeing our natural world.

A healthy natural system is not unlike a functional home. The term Ecology is in fact derived from Greek words literally meaning, "the study of home"

- ◆ Make plaster casts of wild animal tracks
- ◆ Discover one of the largest living things on Earth
- ◆ Watch an animal with a memory better than a human
- ◆ Learn about a forest creature that plants trees
- ◆ Hold a teaspoon full of 100,000 living things
- ◆ Touch something that is 3 billion years old

Instructor: Bruce Thompson: Conservation Education Specialist with ECO Tracs ; Ecology-based Teaching Resources and Curriculum Services. Bruce teaches throughout intermountain West, including project WILD, Teton Science School, Smithsonian and the Yellowstone Institute.

Accommodations: The camp will be held at Trail Lake Ranch in the magnificent Torrey valley. We have rustic but comfortable accommodations and delicious home cooked meals!

Cost \$275 instruction/room/board

Further Questions & information: call Carolyn Gillette-Neary 307-455-2284 or cneary@wyoming.com
